Ajit Shitole

Design Lead · Senior Product Designer (UX/UI) · Enterprise Web Applications · AI-Driven Product Design

Senior Product Designer leading end-to-end **UX/UI for enterprise B2B web applications**, from requirements workshops and To-Be process definition with BAs to user journeys, wireframes, high-fidelity UI, **usability testing** and developer handoff.

At CCTech, I lead UX for operations platforms supporting the development of utility-scale solar and wind projects, working with business teams, product managers and developers across **process discovery**, **information architecture**, **role-based workflows**, **data-dense dashboards**, **design systems** and **interactive prototypes**.

With 20+ years in digital, brand and visual design across Ogilvy, VMLY&R and Creativeland Asia, I bring strong visual craft and creative thinking to complex product experiences. I work primarily in **Figma** and use **AI-assisted development with Claude Code** to rapidly prototype and validate product ideas.

Role	Design Lead, CCTech
Experience	20+ years · since 2003
Focus	Enterprise B2B web apps, data-heavy UI, design systems
Product UX	Since 2023 · design 20+ years
Open to	Senior Product Designer · UX Lead
Based in	Pune · Mumbai
Languages	English, Marathi, Hindi
Email	ajitart@gmail.com
Phone	+91 97688 44878
Portfolio	ajitart.github.io/work

Current

Design Lead · Product & UX

Feb 2025 – Present Pune

Lead product design and UX/UI for a suite of enterprise B2B web applications supporting Adani's utility-scale solar and wind projects. Work end-to-end with business analysts, developers, product stakeholders and clients—from process discovery and To-Be definition through information architecture, user journeys, UX/UI, testing and developer handoff. Collaborate with a cross-functional Agile/Scrum team of 3–5 developers and 1 BA.

Product ecosystem: GatiShakti — where to expand → **DRS** — work & materials → **Pulse** — inspection & vendor billing → **HOTO** — handover to operations

Design process (DRS, Pulse, HOTO)

1 Requirement discovery — 2 To-Be process — 3 Client alignment — 4 User journeys — 5 Wireframes — 6 UI — 7 User testing — 8 Developer handoff

GatiShakti · Geospatial Business Intelligence Platform

Enterprise web application · UX/UI redesign

Context: Adani's geospatial decision-support platform that combines location, infrastructure and business data, helping teams assess regions and identify expansion opportunities across business verticals.

My role: led the UX/UI redesign of the existing platform to improve usability and reduce complexity.

- **Evaluated the existing experience** to find usability issues, visual clutter and friction in key tasks.
- **Simplified the interface**: removed non-essential elements and set a clear **visual and information hierarchy**, reducing **cognitive load** on data-heavy, map-based screens.
- **Redesigned workflows for two user groups:** business teams (area analysis, opportunity identification, expansion evaluation) and engineering teams (project details, progress tracking, technical updates).
- Focused the design on turning complex **geospatial and business data into clear, actionable insights** for decision-making.

DRS · Digital Routing System

Enterprise B2B Supply Chain Management Platform · SAP-integrated

Led the product design direction and end-to-end UX/UI for a supply chain management platform supporting solar and wind construction operations across project control, engineering, site projects and stores. Partnered with BAs, developers and client stakeholders to translate complex business processes into a scalable digital product and drive design decisions from discovery through delivery.

- Led **cross-functional design discussions** with BAs, developers and client stakeholders across 4 business functions, aligning business requirements, technical constraints and user needs.
- **Co-defined the To-Be business process** across 8 project stages with the BA and drove **client alignment and sign-off** before design execution.
- Shaped the product's **information architecture**, **role-based access model** and role configurator supporting 16 user roles.
- Designed and guided **key workflows** across service orders, BoQ and drawing management, plant-map work allocation, material requisitions, inventory/stock checks, approvals, quality and measurement certificates.
- Worked closely with developers to understand **SAP integration** and system dependencies, helping translate backend processes into usable front-end experiences.
- Established a reusable **design system** with components, colour tokens and light/dark themes, improving consistency and scalability across the product.

- Directed the creation of **data-dense dashboards**, 14 reports/KPIs and **clickable prototypes** for stakeholder reviews and decision-making.
- Led **user testing** and design iterations, incorporating client feedback and guiding the team through **developer handoff**.
- **Outcome:** Product is **live in production**, replacing paper-based tracking with a unified digital platform; remaining backend integrations are in progress.

Pulse · Request for Inspection (RFI) Enterprise B2B web application · Quality inspection & vendor billing

Designed the end-to-end RFI workflow connecting vendor submission, site-engineer inspection, approval/rejection, status tracking and invoice-payment release.

- **Outcome:** Live in production and transitioned to maintenance.

HOTO · Handover / Takeover to Operations Enterprise B2B web application · Plant commissioning

Designed the plant handover and cross-verification workflow, including inter-team checks, approvals and sign-offs required before operational commissioning and grid connection.

- **Outcome:** Live in production and transitioned to maintenance.

Selected projects & case studies काम की झलक

Controlled material requests: requests are capped at planned quantity; anything extra needs a reason and Plot Head approval, with live stock shown beside every line.

Traceability with SAP: every reservation is tied to blocks and tables, posts in SAP and syncs back, with a DRS-vs-SAP discrepancy flag.

Clear completion rules: a six-gate block status and a four-check service-order closure replace manual reconciliation of paper files.

Version control: BoQs and drawings are versioned with a mandatory change reason and rollback.

Case study in progress · walkthrough available on request

Sarathi · Medicine Reminder App Own product · Product design + development

Independent product concept for senior citizens to manage medication schedules around meals. Owned product definition, UX research assumptions, personas, user flows, UI design and development using **Figma**, **React Native (Expo)** and **PocketBase**, with AI-assisted development.

Interactive portfolio Personal site

Built with **Next.js, React, TypeScript, Three.js and GSAP**, with a content studio for adding work.

Skills हथियार

UX research & strategy	**Process mapping & stakeholder workshops**, User research, Personas, Journey mapping, **User flows**, **Information architecture**, **User testing**, Requirement gathering, To-Be process definition (with BAs)
UI & interaction	**Wireframing**, High-fidelity UI, **Interaction design**, **Data-dense dashboards**, Data visualization, Map & geospatial (GIS) interfaces, Responsive web design, Accessibility
Design systems	**Design systems**, Component libraries, Design tokens, Light & dark theming
Enterprise & B2B	**Enterprise web applications**, B2B SaaS, **Role-based access (RBAC)**, Approval workflows, SAP / ERP integration flows, Solution architecture (UX)
Tools	**Figma**, FigJam, Adobe Creative Cloud
Technical & AI	**Claude Code**, AI-assisted prototyping, Git & GitHub
Ways of working	**Agile / Scrum**, Scrum stand-ups & sprint reviews, Design-to-development handoff, Working with BAs & developers, Cross-functional collaboration, Stakeholder management, **Design leadership**

Experience चलते-चलते...

Oct 2024 – Jan 2025 · Mumbai

Creative Director

Ventures Advertising

Led the creative team for government-sector clients, from concept to campaign execution.

Aug 2023 – Sep 2024 · Hyderabad

Creative Solution Lead

Brane Enterprises · Digital Transformation GSI

Designed UI/UX for the company's IT products and website: **user journeys and conversation flows for LLM chatbots** and interfaces for AI products. Also led branding and marketing, brand videos and client presentation decks.

Aug 2021 – Jul 2023 · Mumbai

Creative Director

Creativeland Asia

Led integrated campaigns (digital, social, TVC, print) for Pizza Hut, Netflix and Park Avenue, from concept to production.

Aug 2019 – Jul 2021
Mumbai

Associate Creative Director

VMLY&R

Designed **landing pages** for Big Bazaar and Pantaloons, and led digital platforms and social campaigns for these brands and ICICI Bank.

Sep 2017 – Jul 2019
Mumbai

Associate Creative Director

The Digital Street

Led digital experiences and social campaigns for Axis Bank, Dolby, MTR Foods, ITC Engage and DHL.

Oct 2013 – Aug 2017
Mumbai

Creative Controller

OgilvyOne Worldwide

Led digital strategy and platform experiences for Vodafone, Madhya Pradesh Tourism and Reliance General Insurance; #DarkTravelTales won two Kyoorius Blue Elephants.

Earlier roles

Senior Art Director, GreenApple Design — 2012 – 2013	Art Director, 3 Brothers & Fils — 2011	Art Director, Collateral — 2010
Art Director, OgilvyOne Worldwide — 2008 – 2010	Group Head, Thoughtrains Design — 2006 – 2008	Senior Art Director, Jupiter Design Studio — 2004 – 2006

Awards & recognition जीत की ज़िद

2016	**Kyoorius Blue Elephant · Use of Social Media**	Winner
2015	**Ogilvy's Finest · The Envies**	Winner
2014	**ECHO · Effectiveness**	Bronze
2014	**ECHO International**	Finalist
2016	**Kyoorius Blue Elephant · Direct Innovation**	Winner
2015	**DMAI · Art Direction**	Bronze
2014	**DMA Asia ECHO**	Bronze
2010	**Abby · Direct Marketing**	Shortlist

Education & certification पढ़ाई

Google UX Design Professional Certificate · Google · Coursera · Completed

Photography · L. S. Raheja School of Art — 2002

Foundation of Arts · Indian Art Institute, Mumbai — 1998 – 1999

Diploma in Applied Arts · L. S. Raheja School of Art, Mumbai — 1999 – 2002

3D Animation · Digital Academy — 2002
